

Agent-Based Computational Modelling: Applications in Demography, Social, Economic and Environmental Sciences (Contributions to Economics)

This book is the outcome of a project that started with the organisation of the Topical Workshop on Agent-Based Computational Modelling. An Instrument for Analysing Complex Adaptive Systems in Demography, Economics and

Environment at the Vienna Institute of Demography, December 4-6, 2003. The workshop brought together scholars from several disciplines, all- ing both for serious scienti?c debate and for informal conversation over a cup co?ee

or during a visit to the wonderful museums of Vienna. One of the nicest features of Agent-Based Modelling is indeed the opportunity that scholars ?nd a common language and discuss from their disciplinary perspective, in turn

learning from other perspectives. Given the success of the meeting, we found it important to pursue the purpose of collecting these interdisciplinary contributions in a volume. In order to ensure the highest scienti?c

standards for the book, we decided that all the contributions (with the sole exception of the introductory chapter) should have been accepted conditional on peer reviews.

Generous help was provided by reviewers, some of whom were neither directly involved in the workshop nor in the book. All this would not have been possible without the funding provided by the Complex Systems Network of Excellence (Exystence) funded by the European Union, the Vienna Institute of Demography of the Austrian Academy of Sciences, Universit` a Bocconi, and ARC Systems Research GmbH, and the help of the wonderful sta? of the Vienna Institute

of Demography (in particular, Ani Minassian and Belinda Aparicio Diaz). Agent-Based Modelling is important, interesting and also fun-we hope this book contributes to showing that. Milano Francesco C.

Agent-Based Computational Modelling - Applications in - Springer One of the nicest features of Agent-Based Modelling is indeed the opportunity that to pursue the purpose of collecting these interdisciplinary contributions in a volume. in Demography, Social, Economic and Environmental Sciences Economics and Environment at the Vienna Institute of Demography, **Introduction: Agent-Based Computational Demography - Springer** Agent-Based Modelling is important, interesting and also fun we hope this book Applications in Demography, Social, Economic and Environmental Sciences Economics and Environment at the Vienna Institute of Demography, ensure the highest scientific standards for the book, we decided that all the contributions **Agent-Based Computational Modelling: An Introduction - Springer** The present book describes the methodology to set up agent-based models and to study emerging patterns in complex adaptive Contributions to Economics Applications in Demography, Social, Economic and Environmental Sciences. **Agent-based Computational Modelling: Applications in Demography** Editorial Reviews. Review. From the reviews: Presenting and combining different approaches, Kindle App Ad. Share Facebook Twitter Pinterest . It offers the application of agent-based models in demography, social and economic sciences and environmental sciences. Examples include population dynamics, **Agent-Based Computational Modelling: Applications in Demography, - Google Books Result** Thirdly, agent-based simulation is now often used in combination with other more pioneering applications of simulation in the social sciences, in particular, the American economist constructed a series of models whose basic principle is Applications in Demography, Social, Economic and Environmental Sciences. **Agent-Based Computational Modelling - Applications in - Springer** Agent-based models (ABMs) are increasingly used in studying complex adaptive systems. in modelling of problems in the social sciences, including economics, political and related disciplines such as ecology and environmental sciences. of application, some of which are introduced in the contributions to this book. **Intro: Syllabus of Readings for Complex Adaptive systems and Agent** Proceedings of the Global Economy Workshop held at the Santa Fe (Eds.), Agent-Based Computational Modelling: Applications in Demography, Social, Economic and Environmental Sciences, Series: Contributions to Economics, agent-based models in demography, social and economic sciences and **Agent-Based Computational Modelling: Applications in Demography** ing ALife-inspired, agent-based methods into demographic research, we of economics!
