

Graphic Symbols for Distributed Control-Shared Display Instrumentation, Logic & Computer Systems/Isa Standard (Standards & practices for instrumentation & control)

Establishes documentation for the class of instrumentation consisting of computers, programmable controllers, minicomputers, and microprocessor-based systems that have shared control, shared display, or other interface features. Symbols are provided for interfacing field instrumentation, control room instrumentation, and other hardware to the above.

Instrumentation symbol & identification - SlideShare ISA-5.3-1983, Graphic Symbols for Distributed Control/Shared Display This Standard has been prepared as a part of the service of ISA toward a The ISA Standards and Practices Department is aware of the growing need for attention to the Instrumentation, Logic, and Computer Systems, SP5.3, operates within the ISA **Graphic Symbols for Distributed Control/Shared Display** Draft-Standard-for-Trial-Use, ISA-DSTU-5.07.01, Piping and Instrumentation Diagram Documentation Criteria, was issued in May 2002.
