

Applied Parallel Computing: State of the Art in Scientific Computing (Lecture Notes in Computer Science / Theoretical Computer Science and General Issues)

This book constitutes the refereed proceedings of the 7th International Conference on Applied Parallel Computing, PARA 2004, held in June 2004. The 118 revised full papers presented together with five invited lectures and 15 contributed talks were carefully reviewed and selected for inclusion in the proceedings. The papers are organized in topical sections.
