

The Arithmetic of Dynamical Systems (Graduate Texts in Mathematics)

This book provides an introduction to the relatively new discipline of arithmetic dynamics. Whereas classical discrete dynamics is the study of iteration of self-maps of the complex plane or real line, arithmetic dynamics is the study of the number-theoretic properties of rational and algebraic points under repeated application of a polynomial or rational function. A principal theme of arithmetic dynamics is that many of the fundamental problems in the theory of Diophantine equations have dynamical analogs. This graduate-level text provides an entry for students into an active field of research and serves as a standard reference for researchers.

The Arithmetic of Elliptic Curves Joseph H. Silverman Springer Find helpful customer reviews and review ratings for The Arithmetic of Dynamical Systems (Graduate Texts in Mathematics) at . Read honest and **Iteration of Rational Functions: Complex Analytic Dynamical** Buy Diophantine Geometry: An Introduction (Graduate Texts in Mathematics) on The Arithmetic of Elliptic Curves (Graduate Texts in Mathematics) Hardcover. **The Arithmetic of Dynamical Systems - Springer** Graduate Texts in Mathematics For this second edition of The Arithmetic of Elliptic Curves, there is a new chapter entitled Algorithmic Aspects of Elliptic Curves **The Arithmetic of Elliptic Curves (Graduate Texts in Mathematics)** (v The Arithmetic of Dynamical Systems: Preliminary Entry 309 (Graduate Texts in Mathematics) by J.H.
