

HTML Publishing on the World Wide Web (Teach Yourself)

This guide is designed for all World Wide Web users who would like to move on from browsing to publishing on the Net. It is a new edition, updated to reflect changes in the field of HTML publishing and page creation. The book assumes no previous knowledge and is suitable for the beginner. Apart from the basic principles, the text also covers more advanced features, such as making your page interactive or extensively interlinked to other pages. Essential principles are explained and demonstrated by a fully-worked example. Some examples will be available on the Internet in the Teach Yourself home pages.
