

# SAP® Netweaver Gateway: Learn how to use SAP® Netweaver Gateway for UI5 and ABAP projects

SAP NetWeaver Gateway is a technology that provides a simple way to connect devices, environments and platforms to SAP software, based on market standards. Simply put, this is an ABAP add-ons to your SAP ERP system to extend your ERP system capability. SAP Gateway provides an API based approach to build applications and systems, which makes the building and maintaining of complex business scenarios easier. SAP world is moving very fast and in completely new directions and if you do not keep up with them then you will be left out. This book will give you real life experience, knowledge and skills in a very interesting and simple way. It is packed with information, knowledge, hands-on and real life project experience learning. At the end of this book you will be able to:

Understand what is behind the buzzword of API and how it is implemented in an Enterprise. After studying this book, you can work as an API developer in an SAP Netweaver Gateway project.> Learn to implement API management in SAP Netweaver Gateway and in general. Run your first API end-to-end scenario using SAP Netweaver Gateway and SAPUI5.

Who should read this book? Experienced ABAP/SAP developers: You will understand that SAP Gateway is a prime component of the updated SAP systems and very soon most of the development will be happening here. SAP Functional consultants: In future SAP integration projects, your role will come into picture and if you know SAP Gateway then it will be very easy to work with the Technical consultants. SAP Project Managers: You have to manage SAP projects and take crucial decisions about time and cost. By understanding the basics, you will be able to take better decisions and your developers will love you for that. Newcomers to SAP: Learning SAP Gateway is one of the best ways to switch

to SAP marketplace and get an amazing high paying job/contract. Technology enthusiasts/entrepreneurs: SAP Gateway is the way Enterprises are going to implement APIs in ERP systems. Understanding the basics will help you to increase your awareness and give you more ideas that will help you in implementing your own product.
