

## Creating HTML 5 Websites and Cloud Business Apps Using LightSwitch In Visual Studio 2013-2015: Create standalone web applications and Office 365 / SharePoint 2013 applications

[Publishers note: This book is mostly identical to the book: Creating HTML 5 Websites and Cloud Business Apps Using LightSwitch In Visual Studio 2013]This book covers using Visual Studio LightSwitch 2013-2015 to create LightSwitch HTML Client, and Cloud Business Applications. This book describes creating HTML web applications and SharePoint 2013 provider-hosted applications. The purpose of this book is to demonstrate the use and provide examples of, and to explain, important concepts of the LightSwitch technology used to create the applications. Visual Studio LightSwitch 2013 is a development tool that provides the easiest and fastest way to create forms over data, line of business applications. It allows you to build applications for the desktop and the Internet cloud. It does this by providing a tool that allows you to quickly and easily define and connect to your data, program your security and business rules, and expose this via OData to practically any client such as mobile devices and web pages.
