

Technology and Science in the Peoples Republic of China: An Introduction (Pergamon international library of science, technology, engineering, and social studies)

Technology and Science in the Peoples Republic of China: An Introduction tackles several areas of concerns in the technological development of China. The title covers Chinas research structure, scientific resources, and technological priorities. The text first reviews contemporary China, and then proceeds to discussing Chinese history. Next, the selection talks about Chinas objective and policies. The text also covers the Chinese research organizations, along with education and training. Chapter 7 tackles the basic and applied science in China, while Chapter 8 details mass science. The next chapter talks about Chinas policy on environmental protection. The tenth chapter covers electronics, and the last chapter tackles the future of Chinese technology. The book will be of great use to readers who have an interest in Chinese technological progress.
