

Building a Recommendation System with R

Learn the art of building robust and powerful recommendation engines using R

About This Book Learn to exploit various data mining techniques Understand some of the most popular recommendation techniques This is a step-by-step guide full of real-world examples to help you build and optimize recommendation engines

Who This Book Is For If you are a competent developer with some knowledge of machine learning and R, and want to further enhance your skills to build recommendation systems, then this book is for you.

What You Will Learn Get to grips with the most important branches of recommendation Understand various data processing and data mining techniques Evaluate and optimize the recommendation algorithms Prepare and structure the data before building models Discover different recommender systems along with their implementation in R Explore various evaluation techniques used in recommender systems Get to know about recommenderlab, an R package, and understand how to optimize it to build efficient recommendation systems

In Detail A recommendation system performs extensive data analysis in order to generate suggestions to its users about what might interest them. R has recently become one of the most popular programming languages for the data analysis. Its structure allows you to interactively explore the data and its modules contain the most cutting-edge techniques thanks to its wide international community. This distinctive feature of the R language makes it a preferred choice for developers who are looking to build recommendation systems. The book will help you understand how to build recommender systems using R. It starts off by explaining the basics of data mining and machine learning. Next, you will be familiarized with how to build and optimize recommender models using R. Following that, you will be given an

overview of the most popular recommendation techniques. Finally, you will learn to implement all the concepts you have learned throughout the book to build a recommender system. Style and approach This is a step-by-step guide that will take you through a series of core tasks. Every task is explained in detail with the help of practical examples.

Building a Recommendation System with R by - Barnes & Noble Building a Recommendation System with R eBook: Suresh K. Gorakala, Michele Usuelli: Kindle Store. **Building a Recommendation System with R by Suresh K Gorakala** If you are a competent developer with some knowledge of machine learning and R, and want to further enhance your skills to build recommendation systems, **Building a Recommendation System with R eBook -** Learn the art of building robust and powerful recommendation engines using R About This Book Learn to exploit various data mining techniques Understand **Building a Recommendation System with R eBook -** Learn the art of building robust and powerful recommendation engines using R About This Book * Learn to exploit various data mining - **Building a Recommendation System with R - Suresh K** A recommendation engine (or recommender system) is a system that, To build a recommendation engine in R we first need to access and **RPubs - Building a Movie Recommendation System** Editorial Reviews. About the Author. Suresh K. Gorakala. Suresh K. Gorakala is a blogger, data Building a Recommendation System with R Kindle Edition. **Building a Recommendation System with R: : Suresh** Also, well learn about its various types followed by a practical exercise in R. The term recommendation engine & recommendation system : **Building a Recommendation System with R eBook** This is a post about building recommender systems in R.
