

Dream Spaces: Memory and the Museum

The dream space, writes Sheldon Annis, is the reflective experience of encountering yourself within a museum. In *Memory and the Museum*, Gaynor Kavanagh argues that dream spaces are the point at which our inner and outer experiences meld. During the museum visit, memory and the present cease to be disparate but fuse into one singular experience. Drawing from such fields as behavioral gerontology, applied psychology, and historiography, Kavanagh employs research from North America, Australia, and Europe to provide a critical and conceptual exploration into museums and the mind.
