

Effective Use of Teams for IT Audits (Standard for Auditing Computer Applications)

Most organizations find that an empowered team will improve the effectiveness of the IT auditing function. Such a team has the appropriate authority, resources, and skills to perform a project, determine the solution, and implement that solution without outside intervention. Audit management should establish certain guidelines for the teams to follow. Management may approve team assignments, but the team can use whatever resources are necessary to complete that assignment. Team tools are significant ultimate team success. This book includes suggestions for building a team toolbox, and an appendix describing effective team tools.

Effective Use of Teams for IT Audits Standard for Auditing Computer The last audit step in any audit is to perform a self-assessment of the audit and Quality assurance uses the results of the quality control review to assess for the audit team to comment on the effectiveness and efficiency of the audit process.
