

Spreadsheet Modeling in the Fundamentals of Corporate Finance (With CD-ROM)

For undergraduate courses in corporate finance. Spreadsheet Modeling in the Fundamentals of Corporate Finance teaches students how to build financial models in Excel. This book and CD provides step-by-step instructions so that students can build models themselves (active learning), rather than handing students canned templates (passive learning). The spreadsheet models progress from simple examples to practical, real-world applications. They span nearly all of the quantitative models in the fundamentals of corporate finance. The basic philosophy of this product is If they build it, they will learn!
