

Internet Policies and Issues

The Internet has grown to over 300,000,000 websites and a medium for millions of e-mail communications each day. This revolutionary development in the sphere of information and communications has taken place within less than a decade. This hypergrowth has been totally uncontrolled which has resulted in not only growth but also problems. This book discusses key policies and issues such as security, junk email, internet navigation, access, gambling, searching techniques, copyright, indecency, privacy and the next generation internet.
