

Jean Cavailles: A Philosopher in Time of War, 1903-1944 (Studies in French Civilization)

This biography, by his sister, of the logician and Resistance hero, Jean Cavailles, not only traces the itinerary of an exceptional destiny, it also restores the intellectual climate of a segment of French thought in the 1930s. The biography is based on Cavailles philosophical, religious and political concerns. In particular, the use made by Gabrielle Ferrieres of her brothers letters demonstrates the essential unity of Cavailles thought, the man of action married to the philosopher of mathematics, the intellectual recluse of the Ecole Normale Superieure allied to the dynamic leader of one of Frances most famous Resistance networks.
