

Nil-by-mouth (Cancel the Cup Cakes Book 1)

Following an accident, a man comes to in the midst of a quasi-religious experience. His perception of events differs from those around him at the scene, and he does not want to acknowledge the consensus. This is the story of how the everyday reality of his situation becomes part of his life, however much he tries to keep it at bay. After a catalogue of setbacks, our hapless protagonist presents the ultimately life-affirming memoir of his struggle to rebuild his irrevocably changed life. And all set against a backdrop of miscommunication, absurd bureaucracy and a health service with scarcely enough resources to treat the body, let alone the fragile mind, beset as it is by fear, doubt and constant bad tidings. Ranging from the hilarious to the deeply sad, from the surreal to the all too real, from the mystical to the mundane, this is as near to the truth as a fantasist can get, especially after a bang on the head. This erudite report should be prescribed reading for anyone who has ever spent time in hospital, whether as staff or patient. And its for anyone who has forgotten how to see the funny side of abject misery. If you're lucky, this deceptively simple onion of a book will also have you questioning the nature of fear, compassion and communication. This is Volume 1, taking in the first month of treatment leading to the discharge from inpatient care. Volume 2, currently in the process of being written, will deal with his acclimatisation to a familiar home in an unfamiliar body. And there are five more operations to look forward to after you have finished the first volume, as well as some serious amendments to our hero's personal circumstances. No canned laughter. Bring your own. Laugh out loud, snigger up your sleeve, smile wryly to yourself, wipe away a tear, fly into a rage. Read it on a train, the bus or the tube. You'll cause quite a stir. Avoid planes, though. Its full of metalwork. You'll never

pass security.
