

## Essentials: Microsoft Access 2003 Level 2 (Essentials Series for Office 2003)

Backed with over 20 years of writing, teaching and professional experience with electronic spreadsheets, the authors have perfected the format and presentation of Microsoft applications material to suit every type of learning style. Comprehensive information for users at various levels of experience, hands-on exercises and a flexible binding make this a must-have series for applications essentials. Areas covered include designing a complex database, making data entry easier and more accurate, managing data with useful form features, making the input form more user friendly, displaying information with special reports and advanced report features, managing data with special action queries and database utilities, analyzing and summarizing data, filtering data in a linked table using parameters and form filters, using access on the web and hyperlinking to documents. For training professionals.
