

## Just Out Of Reach

Just Out Of Reach is the first book of its kind. It chronicles the story of a family trying to adopt from the foster care system that is told from the child's voice. An appropriate read for people who have ever asked the question or wondered How does this process effect the biological children in the home? Social workers, psychologists, foster and adoptive families, and policy makers alike will find value and insight to the words spoken by this 11 year old child.
