

Android In Application Billing - Developing Applications Using the Version 3 Billing Implementation (Android Development Guides Book 1)

This book provides a guide for Android application developers implementing the Google Play version 3 In-Application Billing Service interface. The second edition has been extended to cover the support for subscriptions that has recently been enabled. The book provides a detailed description of the working of Google's reference implementation and also provides an additional working sample which allows the developer to explore the detailed operation of the billing interface.
