

Complete Internet and World Wide Web Programming Training Course, The (2nd Edition) (Prentice Hall Complete Training Courses)

Now, with one interactive, hands-on course, you can master all the technologies you need to build robust, database-intensive Web applications -- client-side, server-side, and enterprise! Using their renowned Live Code approach, Harvey and Paul Deitel cover it all, from the basics of Web page coding through state-of-the-art servlets, JSP, and wireless development. This completely updated course now includes extensive coverage of open source technologies, including PHP, MySQL, Perl, and Python -- as well as in-depth introductions to Web security, accessibility, and more. This package integrates an interactive Web development training CD-ROM, and the Deitels outstanding 1,300-page book, *Internet & World Wide Web How to Program, Second Edition*. The CD-ROM features 15,000 lines of fully tested and functional code in 250 working programs, along with more than 15 hours of detailed, expert audio descriptions, hundreds of hands-on programming and interactive exercises. Coverage includes: effective Web page design; server- and client-side scripting; interactive Web development with DHTML; e-commerce essentials; repurposing existing Web content with XHTML; programming wireless Web devices with WML and WMLScript; Internet security; and much more.
