

Using QuickBooks 4.0 in the First Accounting Course

This is the first text of its kind to provide a self-paced environment where students use a commercially-available software product to analyze, interpret, and investigate accounting information to make business decisions. This text allows students to see financial statements from a users point of view, as well as learn how to research all the underlying source documents that generate the statements. Managerial aspects of computerized accounting are also covered, such as financial analysis and comparisons. With comprehensive and complete computerized accounting coverage, this text is ideal for your students. Combine that with the fact that full coverage means minimal prep time and effort on your part, there can be no other choice for your course.
